## **West steel storage units are an incredibly flexible and secure storage alternative!**

West storage units are constructed using corrosion resistant galvanized steel, providing better durability and longevity over conventional wood, vinyl clad, and painted steel structures. Plus your valuable items are protected! Our storage units come standard with a high security door bar lock and lever mechanism that is designed to accept any standard lock. Heavy-duty hinges and tamper proof hardware provide additional security. All our containers are man portable, durable and weather tight, making them the perfect choice for a multitude of storage applications.

**West Storage Units can be erected, taken down and moved providing safe, secure storage for your belongings wherever—and whenever—you need it!**

### **Container Usage Options:**

Farm Yards	Highways	Golf Courses
Construction Sites	Military Usage	Conservation Areas
School Playgrounds	Gardens	Equipment Stores
Parks	Landscapers	Workshops
Local Authorities	Sports Fields	Self-Storage & more!

### **Kits Include:**

- Complete floor assembly
- All hardware – nuts, bolts, washers, screws, nails
- Rear panel, side panels, roof panel, and front panel with door
- All hinges, and door bar lock assembly
- Instructions

### **Our Guarantee**

Our goal is to provide the best quality storage container at the lowest possible price. We strive to surpass our competitors by offering an uncompromised level of customer service. All containers have a 5-year guarantee covering defects in material or workmanship, and a 10-year warranty covering rust perforation.

# At a Glance

**Half deep container** | When space is limited

**Standard container** | Our most popular size

**1.5 container** | More room when you need it

**Double container** | For larger equipment or big storage needs

**Skid container** | For transport or general storage

**Storage locker** | For garage or small shop

**Accessories** | Optimize your container

All panels bolt together to provide a weather tight seal

Standard units can be double stacked.

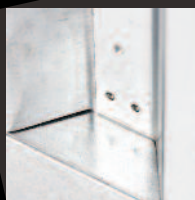

High security bar lock with tamper proof fasteners

Galvanized G90 - Zinc coated finish ensures a long maintenance free life.

Heavy duty lever and hasp accepts any standard lock

Assembled with clinch joints instead of spot welds for better corrosion resistance

Pressure treated skids for long life and durability

The door is reversible. Simply mount the hinges and door bar lock on opposite sides.

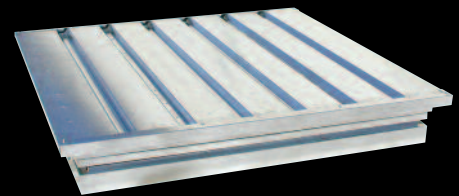

Standard size units (shown) can be moved with a pallet jack or forklift while loaded.

Extension kits available with or without rear door

Units are available in half size, standard size, 1.5 size, and double size.

Units can be disassembled for easy transport or storage

## Skid Container

Made to fit a standard 40" x 48" skid. Available in 78" and 60" heights. Can be used for secure shipping, warehouse storage, or self storage applications. Manufactured entirely with 18 ga galvanized steel. Comes equipped with the same heavy-duty door hardware supplied with our standard container. Portable, durable, and pallet rackable. May also be used without the skid.

## Storage Locker

Ideal for your business, garage, or anywhere else you need to keep your tools or other higher value items secure. Designed to be free standing or to lag bolt to a wall for additional security. Includes 4 shelves. Manufactured entirely with 18 ga galvanized steel. Comes equipped with the same heavy-duty door hardware supplied with our standard container. Ships boxed, unassembled.

# Accessories

(Please check unit compatibility on next page)

## Support Columns

The support column is the building block for most of our accessories. It can also be used on its own to support sheeting, insulation, pegboard, or dimensional lumber. Columns have a maximum weight capacity of 250 lbs per column. Columns are sold as singles and include hardware.

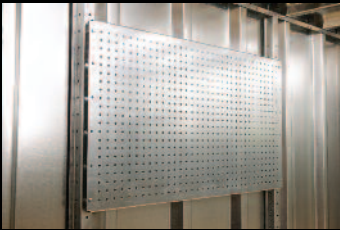

## 2x4 Support Pockets

These pockets attach to the support columns and will accept standard 2x4 or 2x6 lumber. The pockets are designed to be used in pairs. Use the pockets to make heavy duty shelving, a workbench, and even a mezzanine floor. Supplied as a pair with hardware.

## Extension Kits

Kits are available to add 44" or 85" to the length of your container. They are compatible with all standard containers, and may be added at any time.

## Steel Pegboard

22" x 36" Heavy duty steel pegboard. Made from 18 ga galvanized steel for high load capacity. 0.281" holes are spaced on a standard 1" x 1" pattern. Mounting hardware is included, support columns sold separately.

## Entry Ramp

A small utility ramp is available to assist the movement of equipment in and out of the container. A 3/4" OSB board and two support brackets with hardware are included in this kit. The door may be closed with the ramp still in place.

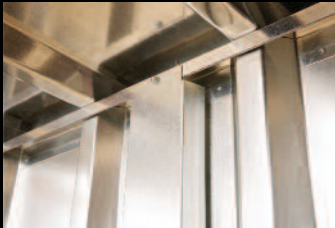

## Wide Door or Rear Door

A wide door may be added to your container to give you 12" of extra width. A rear door may also be added to allow for drive through applications.

## Shelf arms

Shelf supports may be installed on any support column. Supplied as a pair with hardware.

## False Wall

A false wall strip may be used to inexpensively attach sheeting, insulation or other light weight materials to the container walls or columns.

## Locks

A variety of heavy duty locks are available.
